What's Cookin'?

Sort: **Preset** | Date | Alphabetical | Plays | Likes | Comments | Duration

The album page displays nine logos arranged in a 3x3 grid. Each logo is accompanied by a gear icon in the top right corner and a text label below it. The logos are: 1. Bookmark Café (stylized bookshelves and text), 2. Chef Reynolds (chef's hat in a circle), 3. The Atrium (text with a green leaf icon), 4. Elliott Dining (text in a gothic font), 5. LaFollette Square (text with a food icon), 6. The Tally Food Court (text with a window icon), 7. Late Night Dining (text in a neon sign style), 8. Noyer Centre (text with a green vine graphic), 9. Woodworth Commons (text with a green fist icon).

View POIs with the Layar app

Poiz

Poiz is a Layar Creation System (LCS), an online tool for compiling layers. With Poiz you can easily create a layer, with a maximum of freedom in the creation of form and content, without high development costs. Technical knowledge of layers is not necessary! Poiz offers:

- Full control on layer and its content
- User statistics
- Unique test module
- New: **Layar Vision support**

See the other Poiz features

Certified Layar Creation Tool

Poiz has been certified by Layar. It is one of the few tools that have implemented 'Layar Connect', which gives you full control over your layar and its content.

Zaphyrion

Poiz is a product of Zaphyrion, located in Amersfoort, the Netherlands. Zaphyrion is member of the Layar Partner Network

Before you start uploading, be sure to read up on the [best practices](#) on how to take reference images. You will also find some tips on which types of objects work best, as well as some examples.

[Upload a new reference image](#)**Previously uploaded**

The legend below shows ratings assigned by our server based on the quality and clarity of images and their ability to be used for Layar Vision.

- Green means the image is good to go. It should function properly with Layar Vision.
- Yellow means the image will function properly under certain conditions, but we recommend that a better image is used. Try boosting contrast or increasing brightness to improve the image's clarity and definition.
- Red means the image will most certainly not function properly under most conditions. Make sure images are focused with high contrast, definition and brightness. If you need more help making a good image, see our [more detailed guidelines here](#).
