Dreamweaver CS5: Getting Started with HTML5 - 1:58 Hours

Academic Dishonestv:

Academic dishonesty includes but is not necessarily limited to the following:

- A. Cheating or knowingly assisting another student in committing an act of cheating or other academic dishonesty.
- B. Plagiarism which includes but is not necessarily limited to, submitting examinations, or other material as one's own work when such work has been substantially copied from another or prepared as the product of a group experience.

Any student who commits an act of academic dishonesty will be dismissed from the course with a failing grade.

Class Attendance:

Absences are highly discouraged in this class. If you are absent because of a very serious illness or major family emergency on the day when an assignment is due, you must notify the instructor as soon as possible.

Disability Accommodation:

If you need course adaptations or accommodations because of a disability, if you have emergency medical information to share, or if you need special arrangements in case the building must be evacuated, please make an appointment with your Instructor as soon as possible. Students seeking accommodations must contact the office of Disabled Student Development - 765-285-5293. Please note that no accommodations will be made until a student has provided a letter of verification from the office of Disabled Student Development. In addition, accommodations will not be provided in a retroactive manner. So if needed, please contact their office ASAP and provide the appropriate paperwork to your instructor.

The ultimate goal for this course is to have each student understand the complexities and possibilities of web site development.

COURSE OBJECTIVES

Through readings and production experiences, students are expected to acquire a basic working knowledge of web site design. This will include the following areas:

- ... Principles underlying the production of web sites
 - Considering usability at every point in the design process
 - Separating presentation from content as appropriate
 - Defining a general-purpose statement for a web site
 - Assessing the target audience: understanding who they are and their needs
 - Primary steps in preplanning, authoring, and publishing web sites
 - Understand the advantages/limitations of various web technologies
 - Awareness of copyright issues
- ... Elements of appropriate web graphic and navigation design
 - Gain an appreciation for web design techniques & navigation
 - Obtain a working knowledge of eXtensible HyperText Markup Language
 - Creation of graphics for web use: including GIFs, JPEGs, & PNGs.
 - Understand the use of CSS
 - Become aware of Javascript and its use
- ... Construction of an original web site
 - Site design
 - Become familiar with a visual web site development tool (i.e., Dreamweaver)
 - Become familiar with dynamic web environment (i.e., CSS, JavaScript)
 - Asset creation (production of graphical & textual elements)
 - Image and text file importing
 - File management (size, color palettes, naming conventions, etc.)
- ... Evaluation of existing web sites
 - Critique interesting designs
 - Applaud original techniques

QUALITATIVE EVALUATION CRITERIA

Note: Your final grade in this course is determined by overall performance, **not** through the simple result of adding points together.

Production:	Percent	Due Date
Project (Alpha + Beta + Final)	40	Finals Week
Exercises / Readings / Instant Q Lynda.com Training A Book Apart Reading	uizzes (IQ's): 30	(5% each x 6)
Project Proposal	15	March 1st
Discussion / Participation:		
In-Class Discussion	15	
	<u>+</u>	
TOTAL:	100	
A = 90-100% B = 80-89% C = 70-79%	D = 60-69% F = Below 60%	

COURSE SCHEDULE (may be revised to meet the needs of the class...)

Wook 1	Lynda.com	ABA Chapters	In-Class Activity / Discussion / IQ's
Week 1			Intro to course / neeple / IO's
January 10	DW HTML5 Undates		Intro to course / people / IQ's Dreamweaver & HTML 5
January 12 Week 2	DW HTML5 Updates		DIEGITIWEAVEL & FINIL 3
		LITMLE 1	A Drief History of Markeys
January 17	DDING DOOKS TO CLASS	HTML5 - 1	A Brief History of Markup
January 19	BRING BOOKS TO CLASS	HTML5 - 2	Design of HTML 5 - IQ 1
Week 3	Madia Oversiae		LADA
January 24	Media Queries	LITALE	LAB 1
January 26	Native Media	HTML5 - 3	Rich Media - IQ 2
Week 4	Falsacad Olas da ad Tasa		LAD On the office beginning to the form
January 31	Enhanced Structural Tags	LITAN E E	LAB 2a - benefits, basic page layout, sections
February 02		HTML5 - 5	Semantics - IQ 3
Week 5			
February 07	Enhanced Structural Tags		LAB 2b - asides, heading groups, framing artic
February 09		HTML5 - 6	Using HTML 5 Today - IQ 4
Week 6			
February 14	New Wave Typography		LAB 3 - @font-face families, CSS3 type effects
February 16		CSS3 - 1, 2	CSS3 Today, Understanding CSS Transitions -
Week 7			
February 21		CSS3 - 3	LAB 4 - Hover-Crafting with CSS3
February 23		CSS3 - 4	Transforming The Message - IQ 6
Week 8			
February 28		CSS3 - 5	LAB 5 - Multiple Backgrounds
March 01	Proposal DUE		
Week 9			
March 4 - 11	Spring Break		
Week 10			
March 13	Proposal RETURNED		Project Construction
March 13 March 15	Proposal RETURNED Work Day		Project Construction Project Construction

Final Site Proposal

(15% of Total Grade) DUE: Thursday, March 1st

Required:

Write a 4 to 6 page (inc. flowcharts & storyboards), typed, double-spaced paper describing the showcase web site that you plan to develop for this class. This project is to be of your own design (no templates allowed) and may be dedicated to any cause, person, place, or thing (subject to instructor approval;-). Think of this site as a promotional tool to showcase your skills to a future employer. Please start planning what you would like to develop WELL BEFORE the mid-semester deadline. Great designs take time.

The following items should be included and/or discussed in your paper:

- 1. A statement of purpose (i.e., What is the site all about?)
- 2. Identify your target audience (i.e., Who will be your users?)
- 3. List your main objectives (i.e., What do you hope to accomplish with the site?)
- 4. Make a concise outline of the items your site will contain.
 - This should include a description of each sub-area that you plan on building.
 - Describe how the navigation structure of your site will work.
- 5. Draw a simple, full-page, *sitemap* that illustrates the sites' major areas, sub areas, and navigation structure.
- 6. Include a rough full-page wireframe of the main page and one sub area of your site.

Suggestions:

- Remember to consider these design elements as you plan your site:

(Don't worry if you are not exactly sure how you might implement a certain feature at this time.)

- Interactivity (control panels, popups, dynamic layers)
- Interface Style (page layout, icons, overall "look and feel")
- Images & Text (colors, image size, typography, backgrounds)
- Navigation (buttons, tabs, menus, "breadcrumbs", home)
- Multimedia (animation, audio, video)
- Special Effects (rollovers, dynamic navigation)
